

# WHY COLLABORATION CORRELATES TO PERSONAL SUCCESS!

## Hypothesis for Improvement with Collaboration

- Higher-level thinking for the orientation of critical thinking skills
- Leadership skills are in motion
- Better results

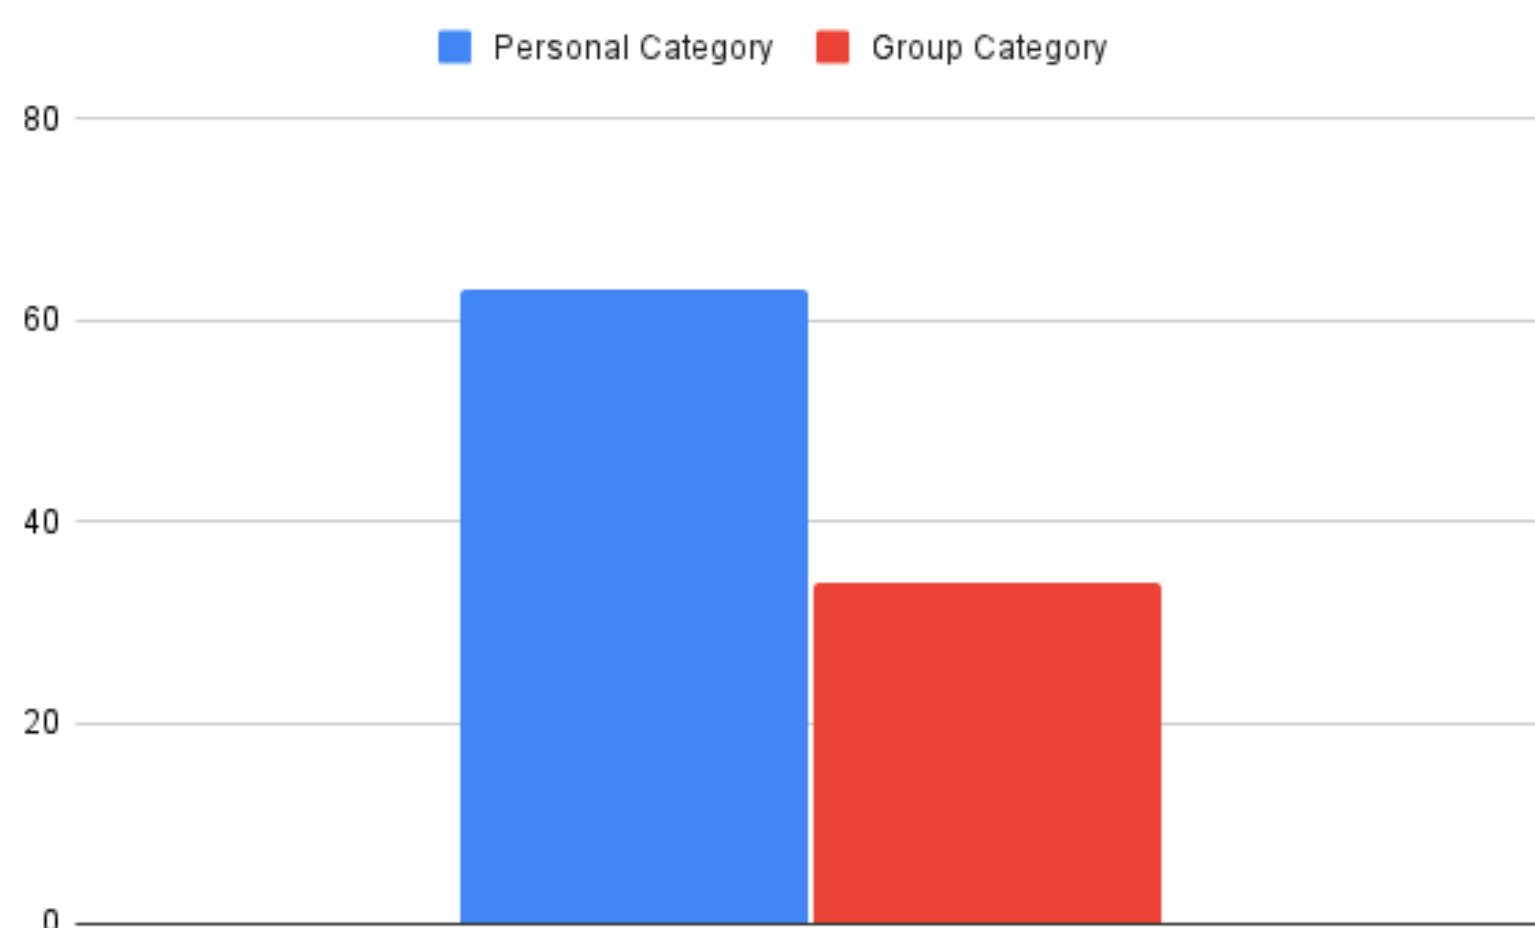

## We have seen this happen in real time...

As part of the NASA project of ranking, individual and group results for ranking 15 objects based on necessary attributes of those objects in specific conditions were yielded and were each compared to NASA rankings for accuracy - survivability was imperative for NASA crew

## What was Our Goal?

**Our goal was to get as close as possible to 0 as possible by subtracting yielded ranked result with NASA specified value and using the absolute value operator on it**

## Our Results

## Conclusion

Individuals did more poorer but group results met expectations data wise for survival on
